<sup>†</sup>Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage, and number of connected devices are not guaranteed and will vary as a result of network conditions, AP limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and AP location.

<sup>‡</sup>Use of Wi-Fi 7(802.11be), Wi-Fi 6E/6(802.11ax), and features including 4K-QAM, Multi-RUs, 320 MHz Bandwidth, OFDMA, and MU-MIMO requires APs to also support the corresponding features. 320 MHz channels may not all be available in the 5 GHz or 6 GHz band in some regions/countries due to regulatory restrictions.

<sup>§</sup>Functionality of MA47BE, such as Bluetooth 5.4, may be restricted on some computing systems and platforms. Please strive to update the device's driver for feature compatibility.

<sup>△</sup>Use of WPA3 requires APs to also support WPA3.

\*Use of MLO requires your router or APs to support the Wi-Fi 7 standard with MLO enabled. Your Windows 11 operating system must also be updated to version 24H2 or later.
