

C6x - Super Flexible, Super Fast, Super Value

Gigabit Radio with Modular Antennas for PTP and PTMP

The C6x radio offers exceptional power and flexibility, making it the ultimate solution for both Point-to-Point (PTP) and Point-to-Multipoint (PTMP) deployments. Capable of delivering speeds up to 2.0 Gbps in PTP mode and 1.75 Gbps in PTMP mode, the C6x ensures high-performance connectivity with advanced interference reduction. Designed for seamless adaptability, it supports a variety of deployment scenarios while integrating effortlessly with existing networks. Building on the modular N5-X family of directional antennas, the C6x allows flexible distance deployments, making it ideal for even the most challenging environments.

Integrated Radio with Modular Antenna Options

The C6x radio's native 8 dBi gain can be increased using modular twist-on antennas, offering the ease and simplicity of integrated radios, but with so much more flexibility.

Noise Just Met Its Match

The link reliability of the C6x starts with the high isolation design of the N5-X antennas—but there's so much more that's new. Based on Wi-Fi 6E OFDMA technologies, the C6x reduces in-band noise impact across the operating channel with dramatically smaller 2 MHz resource units (RU) sizes instead of legacy OFDM solutions, where any noise impacted the full channel.

Incredible Speed and PTMP Scale

Previous OFDM technologies limited the scale of client deployments and the ability to deploy in dense, noisy areas. In PTMP client deployments, the C6x pairs together with new multi-user OFDMA scheduling and beamforming technologies on the A6 access point to enable massive subscriber scaling, advanced noise management, and access to the new low-noise 6 GHz band.

Carrier Grade

The C6x has a robust IP67 design, engineered to endure harsh environmental conditions. Its carrier-grade management capabilities, facilitated by Mimosa Cloud and MMP, enable operators to effortlessly deploy and monitor networks. Together with next-gen RF noise fighting features and new low-noise 6 GHz band support, C6x leads the way in dependable connectivity.
